

ELECTRIFICATION MADE EASY

Why Qmerit

Qmerit's installation service is a premium, turnkey, and hassle-free way to make electrification easy. From certified installers to customer training, see how our comprehensive solution works for you.

Only the best, vetted contractors are accepted into our installation network.

Contractors are fully-licensed, insured, and bonded to meet state and local regulations.

Our contractors are trained and certified on the latest electrification technologies.

All installations include pre-engineering Electrical Load Calculations to ensure proper design and code compliance.

Installations are permitted to ensure code compliance.

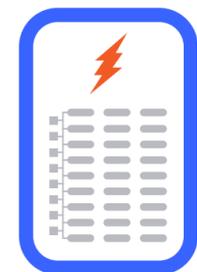

Our installers provide the warranty on parts and service.

Our friendly and knowledgeable customer service team is here to help you. They know their stuff!

1 First, we perform a load calculation to make sure the main electrical panel can safely accommodate the new charger.

2 We install the new charging system as well as the upgraded electrical panel, if required.

3 Our contractors power up the unit and test it for proper operation.

4 Installations include the appropriate permits and follow-up inspection* to confirm proper installation and code compliance.

*As required by local jurisdictions.

PEACE OF MIND GUARANTEE

Included with each of our installations is our "Peace of Mind Guarantee." This guarantee means we have designed your installation with the highest attention to safety and reliability, which is confirmed with a post-installation inspection by an independent third party (local building inspector). We can offer our Peace of Mind Guarantee because we always perform these five important steps:

- ✔ A thorough review of the site and electrical system conditions, including an on-site visit if necessary.
- ✔ A written electrical load calculation and best-in-class design to ensure your EV charging circuit is properly engineered and sized for your home.
- ✔ A City/County electrical permit, as required.
- ✔ A first-rate installation that fits your busy schedule, including a 1-year warranty on our installation.
- ✔ A post-installation inspection will be performed and may be attended by one of our technicians, as required by local jurisdictions.
