

ELECTRIFICATION MADE EASY

Why Qmerit

Going electric can be complicated—but Qmerit makes it easy. Our nationwide network of certified electricians are dedicated to providing safe, hassle-free installation services for EV chargers and other electrification technologies. Nobody is more experienced and recommended than Qmerit, the trusted installation partner to premier EV automakers, charger brands, industry leaders—and thousands of homeowners like you.

FOCUS ON YOUR FUTURE

Every installation starts with a load calculation to guarantee your electrical panel can safely accommodate your EV charger—and meet future needs as your electrification journey continues.

ACCESS TO FINANCIAL INCENTIVES

We proactively inform you of all available rebates to help reduce your out-of-pocket expenses.

CERTIFIED EXPERT INSTALLERS

Our installers are licensed electricians who are insured, background checked and expertly trained on the latest electrification technologies.

INDEPENDENT QUALITY ASSURANCE

We manage all permitting and inspections in accordance with local codes, ensuring your installation is completed properly and safely.

#1 SATISFACTION RANKING

You can be confident in Qmerit knowing we have the highest customer satisfaction scores in the electrical service industry.

EXCEPTIONAL CUSTOMER SERVICE

Our Customer Success Team closely monitors your installation process to deliver a seamless experience every step of the way.

LONG-TERM SUPPORT

We offer an annual safety and service plan so you can enjoy peace of mind knowing your electrical system continues to function correctly year after year.

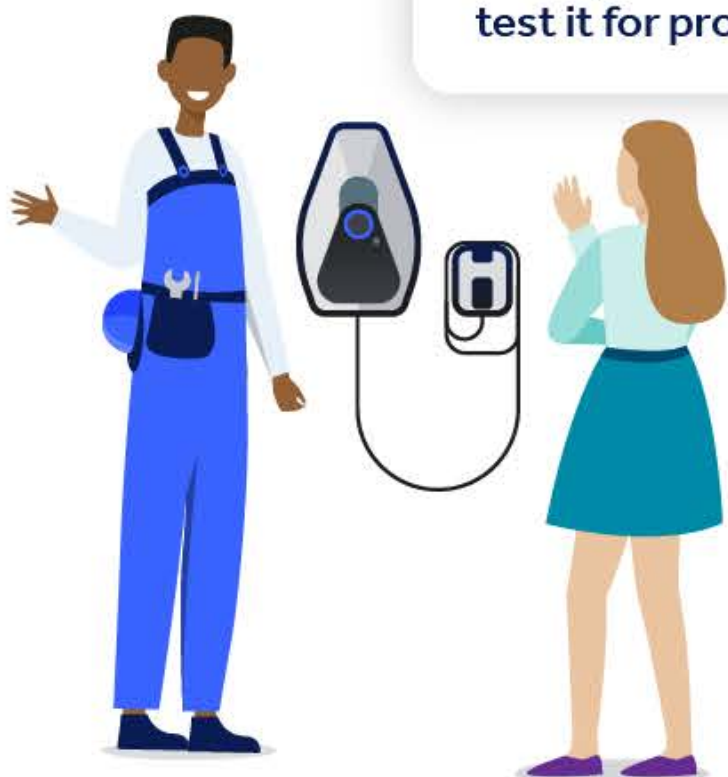

1 First, we perform a load calculation to make sure the main electrical panel can safely accommodate the new charger.

2 We install the new charging system as well as the upgraded electrical panel, if required.

3 Our contractors power up the unit and test it for proper operation.

4 Installations include the appropriate permits and follow-up inspection* to confirm proper installation and code compliance.

*As required by local jurisdictions.

PEACE OF MIND GUARANTEE

Included with each of our installations is our "Peace of Mind Guarantee." This guarantee means we have designed your installation with the highest attention to safety and reliability, which is confirmed with a post-installation inspection by an independent third party (local building inspector). We can offer our Peace of Mind Guarantee because we always perform these five important steps:

- ✔ A thorough review of the site and electrical system conditions, including an on-site visit if necessary.
- ✔ A written electrical load calculation and best-in-class design to ensure your EV charging circuit is properly engineered and sized for your home.
- ✔ A City/County electrical permit, as required.
- ✔ A first-rate installation that fits your busy schedule, including a 1-year warranty on our installation.
- ✔ A post-installation inspection will be performed and may be attended by one of our technicians, as required by local jurisdictions.
