

## Qmerit and ChargePoint

A Strategic Partnership for National EV Charging Solutions

**Commercial • Fleet • Municipality**

*In partnership with ChargePoint for over a decade, Qmerit brings unique value as both an Authorized Installation Partner and Value-Added Reseller.*

### QMERIT SERVICES

- Site Assessments
- Engineering and Permitting
- Installation and Commissioning
- Ongoing Maintenance

## BACKGROUND

In the rapidly evolving electric vehicle (EV) landscape, seamless and scalable infrastructure is crucial for widespread adoption.

As one of the largest and most established EV charging networks with over 329,000 activated ports, ChargePoint is committed to providing reliable and accessible charging solutions to businesses, municipalities, and property owners. With the growing demand for EV charging infrastructure, ChargePoint needed a partner capable of handling large-scale, complex installations across diverse locations while maintaining the highest quality and safety standards.

This partnership aims to deploy a series of commercial EV charging stations across the nation, bolstering the EV ecosystem and supporting the shift towards a more sustainable future.

## THE SOLUTION

ChargePoint selected Qmerit for this significant initiative based on Qmerit's proven track record in managing EV charging station installations. With a network of certified installers across the United States & Canada and a deep understanding of the technical, logistical, and regulatory challenges associated with commercial installations, Qmerit is uniquely positioned to deliver on ChargePoint's needs.

Qmerit's role involves the physical installation of the charging stations and providing end-to-end project management, ensuring that each installation meets local regulations, industry standards, and ChargePoint's rigorous performance criteria.

From site assessments and permitting to installation and final commissioning, Qmerit handles every aspect of the project, ensuring timely and efficient deployment across multiple states.

## SHERWIN-WILLIAMS

---

### Nationwide | USA

Installation and commissioning of ChargePoint CPF50 Level 2 EV chargers at 29 Sherwin-Williams facilities nationwide for fleet use. Includes civil work and infrastructure upgrades at all locations.

## CITY OF LITTLE ROCK

---

### Little Rock, Arkansas | USA

Installation and commissioning of ChargePoint CT4000 dual port Level 2 EV chargers at municipal locations across Little Rock including City Hall, the Little Rock Police Department's Northwest branch, and the Rebsamen Park Golf Course.

## GRATON CASINO

---

### Rohnert Park, California | USA

Installation and commissioning of ChargePoint Express 250 Level 3/DC fast and CP6000 dual port Level 2 EV chargers in the parking structure. Scope of work included civil work and infrastructure upgrades.

## Qmerit

Qmerit is North America's most experienced and recommended provider of implementation solutions for EV charging and other energy transition technologies. Our mission is Electrification Made Easy™, and we're connecting stakeholders from home and business owners to automakers, electrical contractors, fleet managers, utilities, and more.

Irvine, California

*At ChargePoint, we understand that achieving scalable electrification requires a balance of innovative technology and expert collaboration. By working closely with Qmerit's fleet customers and leveraging Qmerit's strong installation and service capabilities, we've successfully deployed EV charging infrastructure across multiple sites.*

*This partnership combines our technology leadership, Qmerit's fleet customers' sustainability vision, and Qmerit's operational expertise to simplify the complexities of multi-site deployment. Together, we're not just advancing fleet electrification—we're creating a model for efficiency and environmental impact that supports long-term success.*
